Avoid Phrasal Verbs

DIRECTIONS: REWRITE THE PARAGRAPH BY ELIMINATING PHRASAL VERBS AND REPLACING THEM WITH SINGLE-WORD VERBS.

A professor at Harvard recently called off a lecture because she found out that a group of students wanted to get rid of her. These students brought up tweets she had made in the past, and they wanted to call her out on her racist comments. Many people were disappointed because this was a professor that students looked up to. The professor, however, pointed out that her tweets were backed up by research, and that the data was not racist. The students did not accept her explanation and remained steadfast that the professor should not get away with hateful language.
