There is a part of the Pacific Ocean where the seafloor widens into a gaping abyss. At 36,201 feet deep, or almost 7 miles, the Mariana Trench is the deepest place on earth. It is a place of immense darkness and mystery. What kind of creatures remain hidden in this trench? Could there be monsters we have yet to discover?

Your mission is to tell the story of a group of researchers tasked with exploring the Mariana Trench. However, as these researchers sank into the trench for the first time, they saw the impossible. Tell the story of what they saw. Then explain what happened next.
