## **Create a Nonprofit Organization**

A nonprofit organization is a legal entity that runs sort of like a business. However, it's goal is not to generate profit for its owners, but to create some kind of public good or service.

Your mission is to think about a good or service that could benefit your community and/or the world, and create a nonprofit organization that delivers that product.

What is the name of your nonprofit organization?

Write a 100-word or more mission statement detailing who your nonprofit serves and how it makes the world a better place.
