Maya The Coder

**Read the beginning of the story below.**
Then finish the story by writing 150 words or more.

In the quiet halls of Jefferson Middle School, an unassuming eighth-grade student named Maya navigated the maze of lockers and classrooms with a backpack laden with books and dreams. While her classmates chatted about the latest trends, Maya's thoughts were consumed by the mysterious world of coding.

Maya, a quiet girl with a passion for technology, spent her afternoons in the school's computer lab, exploring the realms of programming. Her eyes sparkled with excitement as lines of code danced across the screen. Unbeknownst to her peers, she harbored dreams of creating something extraordinary.

One day, the school announced a coding competition, sparking a flame of determination in Maya's heart. She decided to develop a unique app that would help her classmates with their studies. Late into the night, she tirelessly worked on her project, fueled by the prospect of turning her vision into reality.
