Date:

Imagine a place covered in dense forests, teeming with tangled vines, insects, vibrant plants, snakes, jaguars, sloths, monkeys, and so much more. This is the jungle—a world of life, danger, and mystery, usually found in tropical climates.

Write a story that takes place in a jungle. Your story could be about:

- An honest and hard-working jaguar locked in a bitter feud with his corrupt brother.
- A magical tree that begins to speak.
- A dying rainforest, and the profound consequences it holds for humanity.

Feel free to take your story in any direction. All we ask is that your jungle tale is creative, well-written, and fully set in this rich, untamed environment. The rest is up to you!
