# Is Roblox Overrated?

Over the past year, Roblox has experienced explosive growth, which raises a compelling question: Is Roblox here for the long haul, or is it just a passing trend that will fade away?

Roblox is more than just a game. It’s an online platform and marketplace where users not only play but also create games. With over 20 million user-generated games, Roblox stands out as a unique space where creativity thrives. What’s more, creators have the opportunity to earn significant income, with some developers making over a million dollars annually from their games.

So, what do you think? Is Roblox simply a fleeting craze, or does it have the staying power to remain a dominant force in the gaming world?
