Score:

Then/Than

Directions: Watch the video lesson by scanning the QR code above. Then insert either then/than in the paragraph below.

(1), I realized that I had more to do today (2) I had originally thought. I had planned to go grocery shopping first, (3) go to the gym, and (4) meet up with my friend later. However, I quickly realized that I needed to finish some work for my job first, which was more important (5) any of my other plans. After completing my work, I checked the time and realized I had less time (6) I had anticipated. I quickly decided to skip grocery shopping and go straight to the gym, (7) meet up with my friend after. It was a busy day, but I felt accomplished and realized that sometimes plans can change and it's important to be flexible rather (8) rigid.
Directions: Now demonstrate your knowledge on the differences of "then" and "than." Write a paragraph on the topic of your choice inserting both "then" and "than" multiple times.
